

Easy
eyecare
for **your**
workplace

Protect your employees' eyesight the easy way – with Specsavers Corporate Benefits. Our offers are simple to understand, virtually administration free, and excellent value.

Specsavers is a family-run business, with more than 400 locally owner operated stores across Australia and New Zealand.

We have millions of customers, but you can be reassured your employees will always receive personal one-to-one service and care.

Importance of **eye health**

Unless your vision has changed, you may not give your eyes much thought when it comes to health. But your eyes can actually tell us a lot about your general health, even if they don't feel any different. That's why it's so important to have your eyes tested regularly.

A full eye test can detect more serious health issues, such as high blood pressure, diabetes or glaucoma.

We recommend that everyone has an eye test at least every two years. Whether your employees are in front of a computer monitor, in an industrial environment or behind a steering wheel, we have an offer that will allow you to safeguard their eyesight properly.

90% of vision loss in Australia and New Zealand can be prevented or treated if detected early, which is why at every Specsavers store we include an advanced 3D eye scan as part of every standard comprehensive eye test, at no extra charge.

This helps our optometrists detect eye conditions earlier and makes our eye test the most revealing eye test yet.

Corporate Benefits

We understand your employees' health is important so we have designed corporate benefits for you and your employees eye health.

The offers cover all aspects of eyecare for employees and are designed with you in mind.

The Corporate Benefits system

Our no cost system allows you to easily showcase the Specsavers corporate offers within your business via a custom built URL.

Your URL will be personalised to your individual company requirements.

Employees can then register for their Specsavers discount voucher which is issued via email, and sent straight to their nominated email account. Vouchers can also be printed.

The voucher must be displayed either digitally or in print at the time of order for the discounts to apply.

As **easy** as **1, 2, 3**

For you

1. Contact your Australia or New Zealand Specsavers representative
2. Provide Company logo & internal contact to allow your URL to be created
3. Communicate your Specsavers Corporate Benefits URL for employee use

For your employee:

1. Visit your companies URL
2. Complete the registration details for your voucher
3. Present voucher in store at time of purchase
4. Share with your family members (optional)

We'll take care of all the administration from then onwards and there's no admin charge. It really is a simple, controllable and cost-effective scheme.

Our dedicated customer service team is on hand to answer any questions you may have. They can be contacted via email:

Who's it for?

As an employer, do you offer your employees financial assistance for eye care services or eye health items?

Why?

Employees who work for long periods of time in front of monitors, computer screens and other VDU, may experience eyestrain.

As an employer you may offer a financial benefit towards your employees wellness. Via this portal, you can submit approved purchase to orders to any Specsavers store for selected product & services.

Benefits

- No cost development
- Secure system
- Tailored build to your companies requirements
- Agreed maximum spend per employee
- Exceptional support for all clients from our Corporate team

Certified Prescription Safety Eyewear

Benefit

- A full range of safety eyewear to meet the individual needs of your employees

Who's it for?

If your employees work in an industrial environment, they're potentially at risk of damaging their eyes. Our safety eyewear is specially designed to protect eyes from chemicals, sparks, metal fragments and machinery. The scratch-resistant safety lenses could help prevent a serious accident and, as they're prescription lenses, they can be worn in place of the employee's own glasses. All Specsavers frames and lenses are tested to the required SAI Global Medium Impact Standard ANZ 1337.6.2012.

The Specsavers laboratory is audited, accredited and licensed by SAI Global to manufacture our safety eyewear products as ANZ 1337.6.2012 Prescription eye protectors against low and medium impact. The lab itself is ISO 9001 certified. All Specsavers safety eyewear is batch tested annually to ensure certification standards are kept up to date. Specsavers certificate number is SMK40919
